November 2012

## Director's Note

### Salute to Salutes

November is a time when we acknowledge our blessings and gifts, both personally and as a nation. On Veteran's Day, we pause to honor the men and women throughout the years who have worn the uniform of our armed forces. And November also marks the beginning of the holiday season, where, on the last Thursday of this month, many of us will gather together and take stock to give thanks for all of our personal blessings.

Whether it be family, health, prosperity or peace, here is to you and yours this holiday season from the men and women of Pheasantland Industries.

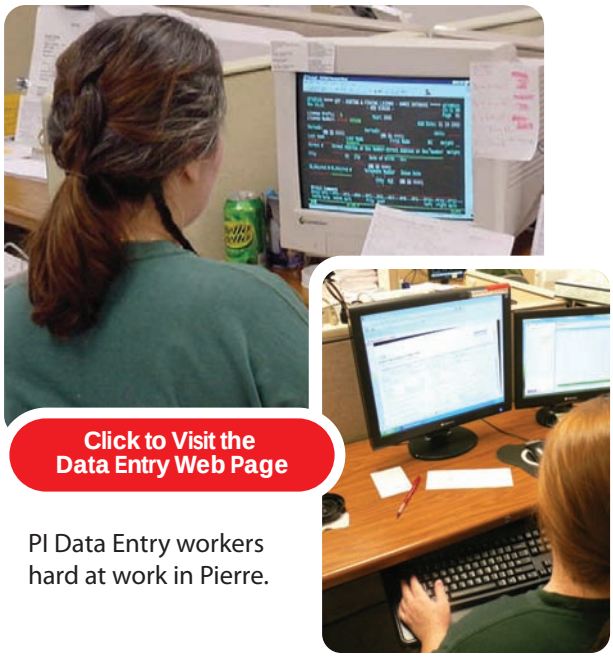
# Data Entry



PI Data Entry workers hard at work in Pierre.

If you or your staff uses up work hours sorting through old paper files in search of valuable information or entering data into data bases, consider outsourcing that work to the Data Entry/Scan Shop.

We perform this sort of work at a fraction of the cost of what can be accomplished by your full- or part-time staff. Our workers have no distractions and it is their full time job to enter and verify data or scan documents into data files that are easy to retrieve.

Several agencies are presently using our services and we have the room, equipment and staff who are capable of doing more. People forward large jobs, involving thousands of documents to be scanned or digitally transferred. In an average month our workers typed 25 million keystrokes to change printed words into digital files and 450 thousand images were scanned and indexed.

So, if you have a collection of files or documents that you consider too great a project to consider changing into electronic files, you may want to think again and give Donna Whitaker a call at (605) 773-2393.
