RISK MANAGEMENT BULLETIN

Issue 43: Anthrax Threat Guide for South Dakota

The South Dakota Division of Emergency Management has developed the following Anthrax Threat Guide for the State of South Dakota and asked our office to assist in distributing this information to all of you.

ATTENTION: In the event of any TERRORISM THREAT - CALL OR HAVE SOMEONE CALL the agencies noted below. Tell them the manner of the threat and the specifics about what is happening and give them your exact location so they can find you. GO TO "Immediate Actions" on back page of this BULLETIN!

1. Call 911, or local law enforcement and explain the nature of the threat. This will usually dispatch Fire, Law, EMS, and in some cases HAZMAT and public health.
2. Call FBI at 605-334-6881 (Sioux Falls), 605-367-7500 (Pierre), 605-343-8632 (Rapid City) or Minneapolis Office after hours number 612-376-3200.
3. Call South Dakota Division of emergency Management Duty Officer 605-773-3231 and explain the nature of the threat this will activate all pertinent state agencies.
4. For immediate health consultation call the Department of Health at 1-800-592-1861 or 605-280-4810.

This Guide is intended to provide recipients of letters and packages containing an anthrax threat with useful information and guidance to help them deal more effectively with an incident, should one occur. (If you have any questions about this guide or need further information to assist with anthrax threat planning, contact LaJean Volmer, Bioterrorism Preparedness and Response Coordinator at 605-773-7593 or Mike Smith Director SO Public Health Laboratory 605-773-3368)

Background

In the past few years there have been numerous threats of exposure to Anthrax through letters and phone calls. During threatening phone calls, the person is usually told anthrax has been placed somewhere in the building or the ventilation system. Typically, the letter threats have advised the reader that anthrax is present in the envelope. Some envelopes contain nothing other than a threatening note, while others contain a variety of non-toxic substances (i.e., cleaning compounds or baby powder). To date all threats have been hoaxes, but reactions to these threats (i.e., quarantine, evacuation, decontamination, and medicating victims) have disrupted many lives, stressed many individuals and interrupted businesses.

Anthrax is a disease caused by bacteria (*Bacillus anthracis*). It can cause disease if a sufficient amount of bacteria is inhaled, ingested or introduced into an open cut or wound. If inhaled, the disease may characteristically begin with mild flu-like symptoms (i.e., muscle aches, fever, fatigue, slight cough) usually 1-6 days after exposure, which may then progress after 2-4 days to more severe symptoms (i.e., high fever, shortness of breath). Anthrax is generally treatable with antibiotics! It is not contagious, (spread from person to person), nor is it easily aerosolized!

Pre-incident Planning: While it is difficult to fully prepare for such incidents, there are a few things that can be done before an incident occurs to promote effective and orderly response

1. Discuss this issue ahead of time and create a response plan that everyone understands, especially mail handlers and secretaries who are likely to open mail.

2. Coordinate your plan with local authorities and have their phone numbers readily available.
3. Be suspicious of letters that do not have a return address and consider opening all mail in a specially designated mail area away from workstations.

Immediate Actions: Do not panic
