 1. Staff are responsible for immediately notifying their regional supervisor or the Executive Director of any physical, mental or pharmacological condition that may affect their ability to perform essential job functions, including carrying a firearm. This includes consuming any mind-altering medication prescribed by a physician, psychologist, or psychiatrist for medical/or mental health purposes or treatment.
 2. The term "pharmacological condition" means the use of any prescription or non-prescription medication or item that may impair performance of essential functions.
