RESOURCES

[Data Entry]

If you have to convert old paper records into an electronic format or consume valuable work hours entering data into databases, consider outsourcing that work to the PI Data Entry/Scan Bureau.

Our data entry workers are focused and it is their full time job to enter and verify information or scan documents into data files that you will find easy to retrieve. Currently, DSS, Game, Fish & Parks, DOT and DHS are utilizing this service, and we have the resources and staff to take on much more at a fraction of the cost of a full- or part-time worker on your staff.

Consider this- from January 1, thru June 30, 2015, our workers logged **111,512,921 keystrokes** in converting files to digital format and **1,041,475 pages** were scanned and indexed. So, if you have files or documents that you believe are too big to consider changing into electronic files, you may want to think again and give Donna or Joan a call.

Portable Bunker Gear Locker

Our fabricators at the Machine Shop recently completed this portable bunker gear locker for an area fire agency. If you are interested in building equipment to your own specifications, give John a call.
