

Director's Note

Well, we sure can't complain too much about the weather this winter. We've had a few cold spells and generally not enough moisture, so let's talk about the high prices you pay **"IF YOU DON'T"** purchase from Pheasantland Industries. Remember to "Buy PI" and get your money's worth. We still have a lot of winter left. Please check out our high visibility/cold weather jackets and our other items to keep you warm and safe. The high visibility yellow and the reflective lettering is a new product that is gathering a lot of fans.

Cold Weather Garments

We have recently taken an order for a local fire department for these jackets. I received a lot of compliments as to quite warm, excellent visibility and very comfortable to wear. Please note that there is a hidden, attached by a zipper not snaps, lined hood in the collar. Please ask about putting your department's name or logo on with reflective lettering

to increase your visibility and draw attention to identify your department and your purpose.

In January we did this athletic taping table for a high school. This is the first one we have done and my customer and I agree that it turned out great. Also, we recently re-upholstered a bench seat for a classic. If you have anything your thinking about getting upholstered or re-upholstered let me know. I would love to do some more interesting projects like this.
