

January 2013

## Product Spotlight

# Machine Shop

Locker cabinets, we can build you a set or multiple sets of lockers, each locker can be locked with a padlock

## Director's Note

Happy New Year everybody. I hope this is your best year ever and it only gets better day after day.

For some of you, it is also a new budget year as well and I hope you will give us a chance to make your budget dollars go further and others, this is your half way point and I hope you will let me help you stretch your budget dollars going into the second half of your budget. As many of you know, we make a great product at a very reasonable price and we can help you to solve unique problems by custom making things you can't order easily. Keep in mind we can re-finish and re-upholster your old furniture at a fraction of the cost of new.

Please be safe this new year and we hope you order our products and we will do our best to keep you smiling all year long.

# Sign Shop

## Product Spotlight

The sign shop has come up with a new design to sell. It involves a tribute to our troops. The sign was designed to give a thanks to those that served, still serving, and those that have never been returned home. There is a spot on the sign that you can add your name, rank, unit, and years that you served. We have also been working some of the local schools in Sioux Falls and surrounding areas to make helmet decals for football helmets. Another project we are working on is getting these same type of materials to do fund raisers for these schools to sell these decals as window clings. There is much more to come from the sign shop and it's getting exciting for me to see these new products once they have been completed.
